

# Seagen Investigator Sponsored Trial Request for Proposals (RFP): Innovation to Achieve Equity in Cancer Care

## Research Opportunity

### Introduction and Purpose

Seagen is committed to improving the lives of people with cancer through innovative therapies in a diverse, equitable and inclusive manner. Recognizing that cancer health disparities persist, to achieve our mission of making meaningful differences in the lives of people with cancer, we are inviting you to submit a concept to research actionable solutions to address health disparities in the following disease area(s):

- Urothelial Carcinoma
- Lymphoma (e.g., cHL, PTCL, sALCL, pcALCL)
- Cervical Cancer

Seagen recognizes there are many complex and interrelated factors that contribute to cancer health disparities. We will prioritize support for concepts designed to produce tangible results and improve the health and wellbeing of patients focusing on the above defined disease areas.

### Research Priorities

- Research proposals focused on proactively and effectively partnering with communities that are affected by health disparities are encouraged.
- Concepts that address the complex nature of health inequity including research that spans different domains (biological, behavioral/educational, physical/built environment, sociocultural environment, and healthcare system) are encouraged.
- Novel concepts are encouraged.

### Additional Considerations

- Multiple applicants are anticipated and optimal research design, feasibility, and the potential impact to research will be evaluated across proposals.
- Concepts will be accepted until **June 15, 2022**
- Budget should accurately reflect the scope of work to be performed.

### Geographic Scope

Concepts must be US-based.

### Instructions to Apply
